## **DETAILED ACTION**

### ***Response to Arguments/Allowable Subject Matter***

1. Applicant's arguments filed 2/6/09, with respect to the rejection of claims in the office action dated 8/6/09 have been fully considered and are persuasive. The rejection of claims 1-10 has been withdrawn. Examiner notes that the arguments that the prior art teaches away from the claimed invention was not persuasive, however, the arguments regarding access of the openable and closeable single termination means within a wall is persuasive. Examiner notes the definition of the phrase "within a wall" to be within a single wall structure as a building is made up of many walls, including walls erected inside that of an "external wall".
2. Independent claim 1 is allowable over the prior art cited because the prior art fails to explicitly disclose or reasonably suggest a unitary optical terminal for termination means housed inside an exterior wall including a subscriber access and provider access that is accessible by both ends via openable and closeable apertures. Remaining claims are allowable by virtue of dependency.
